Part A - Project Planning

Enhanced Task Manager

Goals

Build a reliable task manager with priorities, due dates and search.

Milestones

Week 1: Requirements and planning
Week 2: Core task CRUD features
Week 3: Search, filter and JSON persistence
Week 4: Reporting, testing and documentation

Part B - System Design

Enhanced Task Manager

Main Components

Task: data class holding title, priority, due date and status
TaskManager: adds, updates, removes and searches tasks
Storage: saves and loads tasks as JSON
CLI: reads user commands and prints results

Data Flow

CLI -> TaskManager -> Storage (JSON file)
