Enhanced Task Manager - Project Specification

Document ID: ETM-SPEC-001 Version: 1.0

1. Overview

The Enhanced Task Manager is a command-line application that helps users organize daily work. Users can create tasks, set priorities and due dates, and track progress until each task is completed.

2. Functional Requirements

- Add, edit and delete tasks
- Assign a priority (High / Medium / Low) and a due date
- Search and filter tasks by keyword, status or priority
- Save and load tasks from a JSON file
- Export a summary report

3. Non-Functional Requirements

- Modular code structure that is easy to test
- Clear error messages and logging
- Configuration stored outside the source code
